DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or fairly suggest wherein an apparatus or a method having the following features of the invention:

Incrementing a back-off level counter in response to receiving back-off signal from another station on the network and decrementing the back off counter in response to successfully transmitting the frame as indicated in independent claims 1, 11, 16 & 22.

Accessing the back-off level counter through the host media access controller such that collision resolution can be monitored without snooping the signals over the network as indicated in independent claims 1, 11, 16 & 22.

It is noted that the closest prior art, Trachewsky et al. (U.S. 2001/0055311) shows and describes the back off scenarios and the back off counter when detection collision from the bus. However, Trachewsky fails to disclose all the underlined limitation as described above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
